

KIOSK Environmental Policy

KIOSK Information Systems (KIOSK) is committed to the success and continual improvement of the environmental management system (EMS), and to provide a healthy and environmentally conscious work place into the future.

Environmental programs established by KIOSK are planned and implemented to minimize the environmental impacts of waste streams with a focus on the prevention of pollution. KIOSK maintains its environmental management system in a manner consistent with statutory, regulatory and / or legal requirements. Top management reviews environmental programs at regularly scheduled meetings to ensure their on-going effectiveness.

All KIOSK employees are made aware of the environmental policy through written communications, training programs, or internal postings in common areas. In addition, Suppliers and others working on behalf of KIOSK, have access to this environmental policy via KIOSK's website.
