THE AVANT SERIES

The Avant kiosk is a highly configurable and compact platform designed to house a wide variety of high-demand transaction components. The user interface is presented in a 17" zero bezel projective capacitive (PCAP) touchscreen, providing brilliant resolution and precision touch. It features hinged access doors with distinct component integration for simple service and maintenance.

As configured for Patient Check-in, the Avant provides a platform to simplify patient and work flow, streamline collections, and improve facility services. Patients can conveniently self-identify upon arrival utilizing an optional biometric palm vein scanner. Scanners are integrated for efficient and accurate data capture and ID capture. EMV payment device integration ensures secure transaction automation, for worry-free collections and reduced administrative overhead. The optional bill acceptor adds cash acceptance flexibility.

The Avant is purposefully designed for an efficient and intuitive user experience. ADA compliant with secure and tested components.
