Biometric Border Control Solution (BBCS)

MODULES:

Software is integrated by different Modules that allow identity management:

Pre-enrollment: web based on the JAVA platform.

Enrollment: allows capturing 10 fingerprints, photo, iris, hand palms, scars, tattoos, voice and signature.

Verification: Validates by matching biographic and biometric information. Includes production (personalized) of smartcards.

These are customized for clients' business rules, work flows and operation policies.

CAPABILITIES FOR INTERACTION:

System capability of interaction with different web services or platforms (third parties/externals). This includes payment platforms with banks.

SECURE PLATFORM:

Solution based on a secure platform which validates biometrics of authorized users and allows them access, depending on the permits they have.

EFFICIENCY:

Streamlines and simplifies Government functions, decreasing bureaucracy.

ORDERING INFORMATION:

GSA IT 70 Schedule, Alutiig Pacific, LLC
Contract No: GS-35F-0317Y
Part Number: AQ-GEM-EGT-0001

The **BBCS** streamlines a traveler's entrance and verification with self-service immigration processing that offers mutual benefits, such as lower wait times and minimal interaction with Immigration and Customs authorities. This biometric solution offers the Government or Agency a secure and reliable method for validating the traveler's identity and documentation, while improving the traveler's overall airport experience.

Trusted Traveler Solution

COMPONENTS

BIOMETRIC SOFTWARE:

Based on industry standards (ANSI/NIST, ISO, ICAO, GXJDM/NIEM) that support different data-bases (e.g., MSSQL, Oracle, DB2, etc.)

BIOMETRIC HARDWARE:

Customized kiosks for border and biometric control and management, separated into different types: Enrollment, Verification/eGate, Production, etc. May include biometric smartcards and printed forms (Immigration and/or Customs).

DATA SYNCHRONIZATION:

Easily synchronizes biometric and biographic data (on and off-line), with high reliability and performance.

STOCK MANAGER AND REPORTS:

System that includes management and tracking of biometric cards consumables. Also allows the visualization of information reports.

INFORMATION EXCHANGE:

System capable of exchanging information between different agencies (based on industry standards).

- APC Smart-UPS 1500VA USB
- Turnstile Security Gate Enclosure with steel perimeter gate frame with non etched lexan center.
- Custom Turnstile Flow Tracking System
- Okidata B431d Black Digital Mono Printer (40ppm), 120v, (E/F/P/S) with black 530-sheet 2nd paper tray
- L Scan Guardian R Outdoor 10 print finger print scanner
- Logitech Webcam C910
- Lock, KabaMas Cencon S2000kd
- 3M E-Passport Full Page passport scanner
- 19" LCD Monitor
- 19" Resistive touch screen overlay w/ USB interface
- 19" 3M Privacy filter
- Optiplex XE SFF, Pentium E5300, 2GB RAM. Integrated video, Win 7 Pro, DVD +R/W, 160GB SATA HD, 1 GB RAM for Dell Optiplex
- Proxim ORiNOCO 802.11a/b/g/n USB Client Adapter Network adapter - Hi-Speed USB (consigned)
- Netgear 4 port ethernet switch
- D-Link DUB H7 Hub 7 USB port extender
