*Flexible technology for simple & cost-effective transaction feature additions.*

## KIOSK Money Services Solution

KIOSK's Money Services Solution provides a complete approach to self-service with customizable transaction hardware, software, remote management, and services. Flexible solutions provide valued services for unbanked and cash-preferred customers, improving store revenue while reducing transaction and service labor costs.

It readily integrates with existing service infrastructures / ATM platforms to incorporate complementary, high-demand self-service transaction services including:

- Money transfer
- Check cashing
- Bill payment
- GPR card services
- ATM
- Optional services – top up, advertising, loyalty

KIOSK's modular design disciplines enable clients to efficiently customize a cost effective, market-ready solution.

Provides:

- Fee-based revenue streams
- Cost effective delivery of repetitive transactions (cash, credit, debit, check, change)
- Reduced staffing & infrastructure costs
- Automated cross-sell presentation, Big Data capture
- Improved customer convenience and loyalty
- Secure, encrypted transactions

### Hardware Options:

KIOSK's Money Services Platforms are modular in design for simple customization.

#### Standard options include:

- Premier PC Brands / Application-appropriate Model Options
- 19" (+) LCD / Touch Screen / Privacy Filter
- Speakers
- Security Alarm
- Credit Card Reader (secure and encrypted)
- 80mm Receipt Printer
- Bill Acceptor
- Bill Dispenser (5 denominations)

#### Optional features:

- Bill Recycler
- PIN Pad
- Check Reader
- Coin Dispenser
- Camera / Biometric ID
- Video on Demand
- UL291 Safe

Configurable for stand-alone in-store services, 24 hour unassisted, or through-wall deployment.

## Flexible Platform Features Key to Driving Secure Money Services Transactions

### FINANCIAL SERVICES SOFTWARE

To address the profitability gap and steeper demands of today's financial kiosk market, KIOSK has partnered with ReeveX, an expert provider of transactional software in retail branch banking.

Their Dynamix Platform provides a highly flexible and scalable development environment. It easily integrates with existing financial services platforms to more simply and securely add self-service application feature sets (kiosk & mobile). The retail-targeted solution is both XFS compatible and PCI DSS compliant. The platform flexibility and simplicity of feature inclusion substantially shrinks solution development costs, eliminating the most common market entry hurdles.

ReeveX's multi-function solution automates standard money functions with flexible payment options and secure encrypted transactions. Features target the demands of today's under-banked consumer market, accelerating stagnant transaction demand and improving ROI.

### Four Standard Payment Transactions:

#### MONEY TRANSFER

- Cash, check, debit options to move money to end location

#### TOP UPS

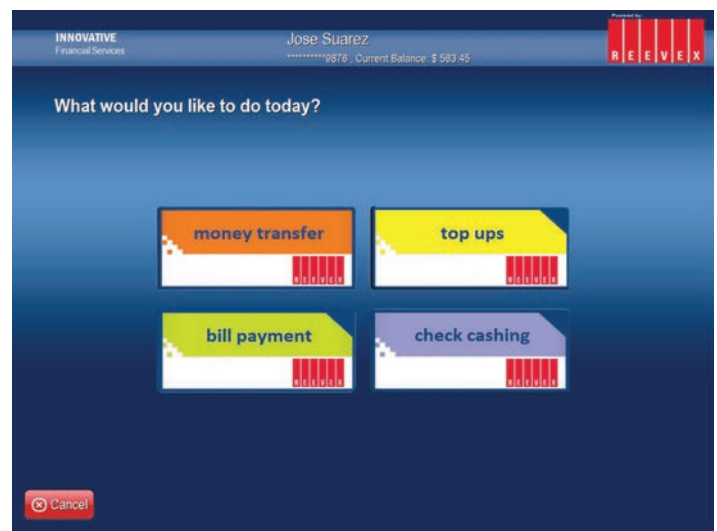

- Multiple payment options allow customers to add balance funds to pre-paid cards

#### BILL PAYMENT

- Real time payments using cash, check, debit, credit

#### CHECK CASHING

- Self-serve cash payout for checks cashed

The Money Services platform includes a complete toolset for the User Interface design, development, device management and monitoring of self-service applications.
