

# The EK Series

## Modular Self-Service Kiosk for Multiple Uses

The sleek modular design of the EK kiosk makes it a popular choice for a variety of uses and industries. Retailers, food service, healthcare, and more can deploy the EK kiosk for a range of self-service applications.

## Ready-to-Order Flexibility

In the retail sector, the EK kiosk can be used for self-checkout, buy online/pickup in store, and product advertising and display. For quick service restaurants, the EK shines as an ordering and payment platform. And for healthcare and other corporate campuses, the EK is an excellent platform for simple check-in and wayfinding.

The EK kiosk can be paired with the software of your choice or deployers can opt to utilize KIOSK's in-house software team for a custom self-service solution. Additional applications from Kiosk Integration Exchange partners add capabilities such as facial recognition, video conferencing, and passive digital advertising.

With ready-to-order availability, the EK kiosk is a scalable self-service solution suitable for deployments of just a few kiosks to large-scale global fleets.

### ✓ Standard Components:

- Proximity Sensor
- Camera
- Printer
