

*Peak Flexibility
and Efficiency*

THE APEX SERIES

To improve your customer experience and increase operational efficiency, the Apex is a modular kiosk design series providing market-ready enclosures to accommodate a wide array of configurations to fit your business needs. This design features a VESA mount LCD that can be configured for a 19-inch or 21.5-inch LCD mounted in portrait or landscape presentation. Enclosure base options include a full-height pedestal for free-standing deployment, or a smaller base option for compact countertop installation needs.

The Apex combines a brilliant Projective Capacitive (PCAP) touch display paired with a flush-mounted PC, providing all-in-one space efficiency. The zero-bezel flush face and minimalist lines complement any retail or hospitality setting to avail your customers greater convenience as well as accelerate operational processes using digital self-service solutions. Apex transaction component options include a side-mounted payment device (multiple), a receipt printer, and a 1D / 2D barcode scanner. All models are ADA Compliant.

All components in the Apex (except the preferred payment device) are manufactured by KIOSK's parent company, Posiflex. Posiflex is a world leader in Point of Sales terminal and related POS componentry delivering high quality, reliable devices with lifecycles that far exceed industry averages. Because the enclosure metals and components are self-supplied (and stocked), KIOSK can provide attractive pricing and lead-time on this popular design series.
