

STYLISH FUNCTIONALITY

The Caddie kiosk provides an attractive and engaging platform with a 22" LCD to spotlight your self-service application. While the visual focus is on sophisticated consumer presentation, the design houses a full array of transactional components for high-powered functionality.

Available as a slim or expanded rear cabinet unit, the Caddie offers versatile enclosure options for virtually all common kiosk transactional devices. The platform accommodates configurations ranging from conventional retail transactions to more complex financial and card based solution requirements. KIOSK can consult on the optimal enclosure choice for your defined component set.

The Caddie features a hinged front access door for simple service access to components. Clean enclosure lines and overhead signage provide a blank canvas for accent finish and branding artwork to complement a broad spectrum of visual merchandising environments and deployment settings.
