

The Outdoor Element Series

The Outdoor Element combines the best integration and design aspects of KIOSK's wide portfolio of custom outdoor designs – yet delivers the simplicity and economy of a standard product. By utilizing a turnkey / standard outdoor model, customers can now achieve a much simpler and economical path to outdoor self-service than ever before.

KIOSK provides unsurpassed custom outdoor design expertise as evidenced by deployments with most of the top tier amusement parks in the US, nationwide ticketing agencies, stadiums, movie theaters, and resorts. The

Element delivers this niche outdoor capability without the time and NRE investments traditionally required – significantly accelerating the ROI model!

Designed for virtually any feature mix, The Outdoor Element can accommodate peripheral options including an outdoor credit card reader, keyboard, receipt printer, or barcode scanner. Through-wall or freestanding installation options.

The 1st standard model to offer turnkey outdoor functionality. A rugged and versatile solution.
