

The Landmark Series

Elevating the guest experience and increasing betting revenues are primary reasons Sports Betting and Casino venues are incorporating kiosk solutions into their digital strategy. The Landmark Series provides an automated, independent option designed to eliminate common customer frustrations in legal wagering, including long lines at peak, strategic hours; limited hours of operation with traditional sportsbooks, and inconvenient locations. As a stand-alone platform, the Landmark kiosk delivers virtually 24/7 betting access within a small footprint; accepts cash, winning tickets and vouchers, and includes an overhead monitor for promoting events, current lines and ads.

The modern and user-friendly Landmark Series kiosk features advanced design aesthetics combined with cost-reduced hardware to hit the sweet spot in the Sports Betting and Casino Loyalty circles. The contemporary zero-bezel user interface is complemented with programmable ambient LCD lighting to elevate the platform look and feel. The terminal accommodates a full range of transaction components, including the ability to be configured with or without a TITO printer, making it a flexible fit for multiple casino preferences. The design has a front-opening door for easy component access and simple service / maintenance.

Designed for ADA compliance, the Landmark Series provides universal guest services.

This sleek and modern kiosk has been well-received by global Sports Betting industry leaders.

Best-in-Class Sports Betting Terminal
