

The Benchmark Series

A KIOSK WITH CURB APPEAL

The KIOSK Benchmark Series combines the sleek, modern lines of a smart phone with deep interior enclosure space to house a highly transactional component set. At first glance, the Benchmark attracts customers with its curved edges and clean, seamless face. The familiar design supports quick user adoption and invites an intuitive user experience for today's connected consumers.

The Benchmark platform accommodates a variety of optional components common to most self-service applications – from card and cash components to scanners, printers, and biometrics. A generous 22" LCD spotlights user interface features, supporting strictly touchscreen or a keyboard interaction.

The Benchmark is configured for simple maintenance and field service with front and rear-hinged service access doors for easy component access. Designed for ADA compliance, the Benchmark provides an optimized self-service platform to all your customers.

Sleek and modern with a user-friendly design.
