VISITOR MANAGEMENT SOLUTIONS

The VISITOR MANAGEMENT Solution provides self-service visitor check-in for facilities requiring secure and professional visitor management. In less than 20 seconds, a user can register as a visitor, print a badge and notify the host employee of their arrival. The automated management system screens visitors against pre-registered visitor lists and internal watch lists, preventing unauthorized visitors from gaining access. Further, the application retains check-in information in the database, simplifying future registrations and improving the visitor experience. The system features centralized reporting and audit trail functions providing enhanced visibility of visitor traffic and compliance.

VISITOR MANAGEMENT Kiosks are an ideal solution for turnkey self-service registration in unattended and high traffic lobbies, reducing visitor wait times and improving lobby desk productivity.

STANDARD CONFIGURATION:

- Durable Powder Coated Steel Enclosure
